About

SafeHuman is a cryptocurrency token on the Binance Smart Chain. SFH tokens are based on proof of stack consensus and built on the Binance Smart Chain, SFH smart contract is based on the BEP-20 algorithm. SFH Works is based on an autonomous yield and liquidity generation protocol that aims to directly reward its holders whilst concurrently increasing liquidity. A 5% transaction fee rewards holders and SafeHuman donates significant sums to charity to protect Humanity.

Purpose

SafeHuman's top priority is doing what's best for people. We offer everyone an opportunity to invest their hard-earned cash and make a profit. Our company is guided by ethical practices including honesty and taking steps to protect humanity's future. We've created a powerful digital currency to build a new economy starting today.

Tokenomics

A 5% transaction fee reward of 3% will go in a liquidity-pool to increase token price, 1% for marketing and 1% for reaming will be distributed to holders. Holders don't need to do anything other than hold their tokens in order to earn rewards.

Token Sale Proceeds

Token Distribution

Token Supply & Allocation

Total Supply at Launch 100,000,000,000

Pre-Sale Allocation 80,000,000,000

SafeHuman Charity

Global Poverty, Clean Water & Hunger

Distributed Ledger Technology generally has amazing potential to empower social impact programs around the globe. Reduced transaction and administrative costs insure that the beneficiaries realize the utmost impact of donations and eliminate corruption and waste.

The United Nations World Food Program (WFP) estimates that 50% of the benefits they deliver are going to be cash-based transfers by the year 2021. Utilizing SafeHuman blockchain technology, transaction costs will decrease from 3.5% to less than 1% saving millions of dollars that can be used to help many more needy people.
